

A close-up photograph of a man in tactical gear aiming a rifle. He is wearing a grey helmet, clear safety glasses, and a grey t-shirt. The rifle is black with a Picatinny rail. The background is a plain, light-colored wall.

IRON SIGHTS

TRIED AND TRUE.

Irons still have their place. Primary and even secondary optics aside, iron sights remain an effective means of getting shots on target despite being more of a tertiary redundancy today. Leapers iron sights are intuitive, minimalistic, and available in different configurations. Your backup has arrived.
