

# RECEIVERS

A woman with dark hair, wearing clear safety glasses and a black long-sleeved shirt, is shown in profile aiming a black rifle. The rifle is equipped with a large scope and a red dot sight. The background is a white, possibly damaged, surface. The text 'RECEIVERS' is overlaid in large white letters at the top.

## MICHIGAN MADE. UNCOMPROMISING STANDARDS

Michigan made and designed from the ground up to provide shooters with functionality that benefits their skill set. UTG PRO® billet 7075-T6 receivers drill down to the very last detail with shooter-focused ergonomics, rigid reliability, common parts compatibility, and a lightweight overall design. Perfect for the basis of your next build.

## MIRRORED BATTERY OF ARMS

Truly ambidextrous with left and right side bolt catch, bolt release, and magazine release. All controls located exactly where expected. All controls manipulate similarly as expected. Enhancements not just for a dominant right- or left-handed shooter, but for any shooter having to shoot either hand based on what their environment and situation demands.

## ENHANCED ERGONOMICS

Flared magwell to facilitate faster and smoother reloads. Firmly planted trigger finger indexing points for small, medium, and large hands. Overall melted receiver geometry reduces snag points and hot spots. Integral oversized trigger guard for gloved use.

# READY TO TRAIN. TRULY AMBI.

What does a standard forged mil-spec AR do well and is there room for true improvement when functionality, ergonomics, and cosmetics come into play? UTG PRO<sup>®</sup> AR receivers, designed and influenced by the professional, competition, and rightful civilian alike. Shooter-focused ergonomics, rigid reliability, common parts compatibility, and lightweight overall design. Proudly designed and made in Michigan.

## EASE OF INSTALLATION

Captured buffer detent and rear takedown pin detent prevent loss or damage when removing receiver end plate and buffer tube. Threaded steel pins in place of typical roll pins for easier assembly. Optional upper to lower receiver tensioning screw included.

# TRUE AMGI

## MACHINED TO LAST

Precision machined at UTG PRO® in Michigan USA on Mazak HCN4000 4-axis horizontal milling machines. 60 cutting tools, 135 checked dimensions, & 5 lbs of billet stock cut to 0.5 lbs. Durable 7075-T6 billet Aluminum finished in Matte Black Hardcoat Anodize.

## DELIBERATE CONSTRUCTION

Tight tolerance fit of upper and lower receiver, takedown and pivot pins, and barrel extension. One additional Picatinny slot over the standard upper receiver flat top. Upper receiver features an optimal 90-degree brass deflector and is cut for M4 feed ramps.
